2018 Bulls from Cornell Farms

Welcome to our 2018 Bull Sale pamphlet. This is our 55th anniversary selling breeding stock. It hasn't been a business for the faint of heart. Over the years we have put a strong emphasis on building the best cow herd we could.

Not only do they have to fit the environment here (grass only for cows), but they have to get the job done in a hands-off manner. Calving ease, good feet and legs and excellent udders. Get the basics right and then select for production! We have never had a C-section here on a first calf heifer for too big a birth weight.

Most customers keep replacement daughters from the bulls acquired here. We retain bulls to use ourselves out of our top cow families. That's why the cows are so darned important. Heifer bulls or growth and power bulls are available. Come early for the best selection. Check out the bulls on our website too.

Definition of Terms

CE: Calving Ease

ADG: Average Daily Gain

BW: Birth Weight

SC: Scrotal Circumference

AWW: Adjusted Weaning Weight

AYW: Adjusted Yearling Weight

FS: A score determined by a mathematical calculation involving age and hip height. It's an indication of what the mature size of the animal will be.

BW EPD: Measures how much above and below the breed average an offspring will gain due to the parent.

CE EPD: Predicts the ease with which the progeny of the animal should be born.

WW EPD: Reflects progeny growth difference up to 205 days.

YW EPD: Reflects progeny growth from weaning age to yearling age.

TM EPD: Combines the genetics for pre-weaning growth and the influence of milk on the weaning weight of the daughters' progeny.

MILK EPD: Indicates the ability of a sire's daughters to provide their calves with an environment which encourages growth from birth to weaning through milk production and mothering ability.
